

Synthetic, lightfast fatliquoring agent for Clothing and gloving leather

CHARACTERISTICS:

Chemical Composition	:	Aliphatic hydrocarbons and alcohols sulfonated by special methods.
Aspect	:	Reddish brown viscous liquid.
Active Matter	:	60% ± 2
pH(10% emulsion)	:	7.5-8.5
Stability	:	Stable to neutral salts, bases, acids and chrome salts at concentrations normally used in tanneries.
Storage Stability	:	Due to its natural property, VEGRASSOL CS-14 has a tendency to become viscous and turbid at low temperatures. However it does not affect the application properties. Atleast 6-9 monaths when properly stored.

PROPERTIES & APPLICATION:

VEGRASSOL CS-14 gives good softness when used in rechroming. In combination with VEPROVOL VA & LNE gives good softness and fluffiness to Nappa & dry milled leathers.

VEGRASSOL CS-14 exerts highly penetrative fatliquoring effect with a nice surface feel, imparts elastic grain, lightweight to the leather. it does not create greasiness on flesh side of the leather, even then when used in higher percentage.

VEGRASSOL CS-14 is particularly suitable for fatliquoring high quality leather such as Garment, Nappa, softy and bag leather, Upholstery, Lining & all types of soft leather.

VEGRASSOL CS-14 can be used 2-12% depending upon type of leather and result required.

The above results have been obtain from trials in our laboratory and plant in the light of changing conditions, they can serve only as a guide and are therefore offered without obligation.
