

Lightfast special fatliquoring agents for Softy Nappa and clothing leather as well as for soft upper leather

CHARACTERISTICS:

Chemical Composition	:	Reaction product of partially sulfochlorinated aliphatic Hydrocarbons combined with special Softeners.
Aspect	:	Light brown liquid
Active Matter	:	50% ± 2
pH(10% emulsion)	:	7.5-8.5
Stability	:	Stable to chromium and aluminium salts, bases and acids at usual concentrations; compatibility with anionic dyestuffs and vegetable tannins
Storage Stability	:	Atleast 6-9 months when properly stored.

PROPERTIES & APPLICATION:

Even without the additional use of other oils, **VEGRASSOL MBS EXTRA** ensures a well-balanced fatliquoring effect throughout the whole leather cross section. Lightweight leathers of excellent softness are obtained. Neither colours nor the adhesion of the finish are unfavorably affected.

VEGRASSOL MBS EXTRA imparts dry feel to the leather and also imparts better buffing and snuffing properties with a sort and even nap, which makes it more suitable for Nubuck, suedes and upper leather. Product can be used in pickling & rechroming also.

VEGRASSOL MBS EXTRA has outstanding stability to electrolytes and has high capacity for stabilising fatliquors. Product can be used 2-6% depending upon type of leather to be produce and require softness.
