VICASTOL ESS

Lightfast fatliquoring agent for all types of soft leathers

CHARACTERISTICS:

Chemical Composition	:	Based on a sulfonated Synthetic Ester oil.
Aspect	:	Reddish brown viscous liquid.
Active Matter	:	60% ± 2
pH(10% emulsion)	:	7.5-8.5
Stability	:	Stable to acid, alkali, chrome and aluminium salts.
Storage Stability	:	Due to its natural property, VICASTOL ESS has a tendency to become viscous and turbid at low temperatures. However it does not affect the application properties. 12 Months when property stored.

PROPERTIES & APPLICATION:

VICASTOL ESS penetrates well into the leather. Even without the additional use of other oils, a well balanced fatliquoring effect throughout the whole thickness of the leather is obtained. VICASTOL ESS imparts excellent softness, very good fluffiness and slightly waxy surface feel. It imparts lightweight to the leather.

VICASTOL ESS has good electrolyte stability and provides uniform distribution of fatliquors throughout the cross section of the leather. It can disperse untreated oils, syntans & dyes.

VICASTOL ESS is lightfast hence suitable for fatliquoring white and pale leather and it is also suitable for Upper, Nappa, garment & all types of soft leather. **VICASTOL ESS** can used 2-8% depending upon type of leather to be produced and result required.

The above results have been obtain from trials in our laboratory and plant in the light of changing conditions, they can serve only as a guide and are therefore offered without obligation.
