

Pure synthetic lightfast fatliquor suitable for sheep, goat, Cow, buffalo in production of all types of leather

CHARACTERISTICS:

Chemicals Composition	:	Based on Sulphochlorinated paraffin wax and aliphatic hydrocarbons.
Aspect	:	Medium brown free flowing liquid.
Active Matter	:	70% ± 2
pH Value (10% Soln)	:	7.5-8.5
Light Fastness	:	Excellent
Stability	:	Stable to mild acid, alkali, salts & hard water.
Storage Stability	:	9-12 months under normal conditions.

PROPERTIES & APPLICATION:

VICASTOL SN provides uniform distribution of fatliquor throughout the cross section of the leather. hence imparts good softness without making the leather loose.

VICASTOL SN produces leather with good fullness, softness and ensures firm and smooth grain. It imparts light waxy touch with full handle.

VICASTOL SN versatile fatliquor suitable for all types of leather such as Upper, Softy, Lining, Nappa, Garment, Suede, Nubuck, Gloving & Bag leather etc.

Since it has excellent lightfastness thereby suitable for production of white and pastel shade leather.

VICASTOL SN can be used 2-8% depending upon type of leather to produced and desired softness
