VICASTOL VX

An anionic lightfast synthetic fatliquor for versatile leather goods and articles

CHARACTERISTICS:

Chemical Composition	:	A sulphochlorinated paraffin wax based synthetic fatliquor
Aspect	:	Brown coloured viscous liquid
Active Matter	:	75% ± 2
PH(10% emulsion)	:	7.0 - 8.5
Stability	:	The product is stable to acid, alkali, chrome and hard water
Storage Stability	:	At least 6 months if properly stored. Under shade and at room temperature

PROPERTIES & APPLICATION:

VICASTOL VX has versatile applications and its surface touch makes it highly recommended for light coloured softy leather goods.

VICASTOL VX imparts very good inner softness with waxy touch. Due to its excellent light fastness and heat resistance, it does not change the colour of the leather.

VICASTOL VX has capacity to disperse fatliquors and retanning agents, hence it imparts good softness with sound body to the leather

VICASTOL VX is highly recommended for softies like Nappa, Gloving, Garment, Upholestry & Bag leathers etc. It is a multipurpose fatliquor for Cow, Buffalo, Goat and Sheep origin.

VICASTOL VX can be used 1-5% on shaved weight depending upon the type of leather to be produced and result required.

The above results have been obtain from trials in our laboratory and plant in the light of changing conditions, they can serve only as a guide and are therefore offered without obligation.
