

A fine particle size poly acrylic resin dispersion, suitable for softy and upper leather

CHARACTERISTICS:

Chemical Composition	:	Aqueous polyacrylate dispersion
Aspect	:	Creamy white emulsion
Active Matter	:	37% ± 1
Film nature	:	Medium soft
pH-Value (10% Soln)	:	7.5 - 8.5
Ionogenicity	:	Anionic
Storage Stability	:	6 months when properly stored

PROPERTIES & APPLICATION:

VICOSIN 2255 is a versatile medium soft binder with good filling, good adhesion and with good wet and dry rub fastness properties.

VICOSIN 2255 produces thin film with dull look, hence improve the miner grain defect of the leather, imparts pleasant and smooth grain surface.

VICOSIN 2255 has good plate and print release properties with good coverage and cold crack resistance. It can be thickened with ammonia.

VICOSIN 2255 can be used in combination with other acrylic resin i.e. Vicosin 2319 & Vicosin S-83, protein binder, wax, fillers and slip agent etc.

VICOSIN 2255 can be use for softy, upper, leather board, printed and smooth leather.

The above results have been obtain from trials in our laboratory and plant in the light of changing conditions, they can serve only as a guide and are therefore offered without obligation.
